

16TH ANNUAL

REGIONAL STORMWATER CONFERENCE

OCTOBER 6-8, 2021 | ONLINE

PO Box 16098 • Tallahassee, FL 32317 • (866) FOR-SESWA [367-7379] • SESWA.ORG

October 6, 2021

Welcome to the Southeast Stormwater Association's 16th Annual Regional Stormwater Conference! On behalf of the Association, I want to personally thank you for taking time out of your busy schedule to join us. We recognize that you have a choice and we're so glad you're here!

This Conference and the Association are unique in that they bring together stormwater professionals from throughout the region to collaborate and learn from each other. The conference workshops are prepared and presented by practitioners like you. We are excited to have some of the most talented speakers from across the Southeast who possess a wealth of knowledge on stormwater management, finance, permitting and more. I hope you'll agree that we have put together an outstanding Conference agenda.

A couple of details . . .

- **Agenda** – The Agenda is available online at www.seswa.org/2021agendaonline.
- **Live Conference** – Access the live conference online at www.seswa.org/2021live. From the Live Conference webpage you can select the sessions that are of interest to you and easily navigate between tracks.
- **Chat** – During the live conference we encourage you to talk with your peers through the Chat feature on the Zoom toolbar. Share your comments and thoughts about the presentations and be sure to select “All Attendees and Panelists” before sharing to ensure that everyone can see your comments.
- **Questions** – Submit questions for presenters to answer live through the Q&A feature on the Zoom toolbar. Questions are encouraged and are a great opportunity to interact with presenters and further your education.
- **Continuing Education and Evaluations** – You will receive an email at the conclusion of each day for which you are registered for the conference. The email will include a link to an online Continuing Education and Evaluation Form. For details visit the CE section in this notebook.
- **Sponsors** – SESWA would like to thank all of the Annual Conference Sponsors! We encourage you to contact these sponsors to thank them for their support of SESWA. View sponsors messages on the conference materials webpage at www.seswa.org/2021materials.
- **Conference Materials** – You can access conference materials including presentations, the conference notebook, sponsor messages and more on the conference materials webpage at www.seswa.org/2021materials.

I would like to take this opportunity to thank our Conference speakers, sponsors and the Conference and Education Committee members. Their assistance and support make this event possible. We hope you enjoy your time with us!

Scott Hofer, President
Southeast Stormwater Association

Scott Hofer, PE
President
Jefferson County DOH, AL

Cory Rayburn
Vice President
Jacobs

W. Dave Canaan
Secretary- Treasurer
Mecklenburg County, NC

Danielle Hopkins

2021 Annual Conference Agenda

[Wednesday](#) - [Thursday](#) - [Friday](#)

Wednesday, October 6, 2021 / Pre-Conference

1:00 p.m. - 3:00 p.m.

(Pre-Conference Workshop)

2.0 credits

**Separate Registration
Required**

Pre-Conference Workshop - Effective Stormwater Public Education and Outreach

Stormwater Education - Getting Messages to the Public from a Safe Distance

While new construction continued this past year, getting in front of people face-to-face for training and education was challenging. This session will explore ways to move a contractor education program online and how to conduct litter cleanups to continue reaching the growing population. Data was collected, programs goals were met, and reports were still submitted, but how the outreach was conducted changed significantly. This session will provide a look at lessons learned around stormwater education efforts in one of the nation's fastest growing populations.

*Trish Ouei, Urban Stormwater Educator
University of Arkansas Division of Agriculture*

Empowering Citizens with a Voice and Role in Municipal Stormwater "Our Voice Our Water"

Municipalities are required to reduce the impact of stormwater runoff on the water quality of receiving streams while interacting with citizens to provide educational outreach. This session will address developing an understanding of challenges and interests within under served, marginalized, or low-income neighborhoods, and methodologies for building two-way communications and trust.

*Regina Guyer, PE, President / Facilitator
Rising Solutions / Regional Stormwater Partnership of the Carolinas (RSPC)*

*Bryan Patterson, PhD, Assistant Professor of Interdisciplinary Studies
Chair of Public Leadership Studies Minor Program, Johnson C. Smith University*

*Kari Raburn, PhD, VP of Chemistry and Engineering / Facilitator
Rising Solutions / Regional Stormwater Partnership of the Carolinas (RSPC)*

Gaining Ground for Healthy Waterways with Sustainable Residential Landscapes

Building from successful models in other states in the Southeast, the Tennessee Smart Yards program promotes sustainable landscaping practices through a lens of surface water quality protection. We will provide an overview of the new virtual platform where participants can contribute from the comfort and safety of their own homes, learn at their own pace, and adopt recommended practices as they work towards a certified Tennessee Smart Yard.

*Andrea Ludwig, PhD, Assist. Professor of Ecological Engineering & Ext Specialist
University of Tennessee*

*Julie Berbiglia, Education Specialist
Metro Water Services*

Thursday, October 7, 2021 / Regular Conference

9:00 a.m. - 10:15 a.m. Welcome & Opening Address

(General Session)

1.00 credit

*Scott Hofer, President
Southeast Stormwater Association*

*Danielle Hopkins, Executive Director
Southeast Stormwater Association*

New Initiatives in Stormwater Management - A Southeast Perspective

This session will give you a better understanding of how new permitting programs and proposed regulations can impact your jurisdiction, and how local governments in other states are responding. A panel will discuss the new regulations and their potential impacts, and strategies for implementation in their jurisdiction and state. Audience questions will be encouraged.

*Jeaneanne Gettle, Director Water Division
Region 4, US EPA*

*Dave Canaan, Director, Storm Water Services
Mecklenburg County, NC*

*Katie Beth Jennings, Environmental Services Manager
Columbia County, GA*

*David Mason, Associate Water Resources Engineer
CDM Smith, TN*

*Synithia Williams, Stormwater Division Manager
Richland County, SC*

10:15 a.m. - 10:25 a.m. Break

10:25 a.m. - 11:10 a.m. Three Keys to a Successful Infrastructure Project in Residential Neighborhoods

(Track A)

0.75 credit

The Swann Street neighborhood, located in the City of Raleigh, NC, experienced frequent structural and street flooding and did not meet the City's desired 10-year Level of Service (LOS). A drainage improvement project was developed with a goal of mitigating structural flooding and bringing the City's streets to the desired LOS. The drainage project installed several large pipe sections, included the replacement of driveway bridges, incorporated unique in-stream structures, and relocated utility lines. This session will reveal three key approaches of a successful stormwater infrastructure project that minimized the impact to surrounding residential neighborhoods.

Marc Horstman, PE, PH, CFM, Project Manager
WK Dickson

David Kiker, PE, CFM, Project Manager
City of Raleigh, NC

10:25 a.m. - 11:10 a.m. [ENCORE PRESENTATION*] High Definition Stream Survey (HDSS): A Powerful Tool for Water Resource Management

(Track B)

0.75 credit

*Popular Session Offered in
Two Time Slots

Join us to see firsthand how the HDSS method provides a “virtual tour” of the waterway while providing GPS, depth, side scan imagery, water quality, velocity and other data linked to each second of the high definition video. This rapid, data-rich and inexpensive stream survey method is a powerful tool for water resource management.

Brett Connell, Hydrologist / Director of Sales
Trutta Environmental Solutions

11:10 a.m. - 11:20 a.m. Break

11:20 a.m. - 12:05 p.m. BREAKING NEWS: Lake Lanier Watershed 5-Year Research Plan Implementation Update

(Track A)

0.75 credit

The Lake Lanier Watershed 5-Year Research Plan, developed through stakeholder, scientific, and technical expert input provides a roadmap of 32 applied research project concepts for the protection and preservation of the Lake and its watershed. This presentation will review the approach taken to plan development, introduce the prioritized applied research project concepts, and discuss the approach that will be utilized to fund and implement the plan. Learn more about the projects under the plan and how YOU can get involved in protecting this critical resource.

Kristan VandenHeuvel, ENV SP, Strategic Director of Research and Engagement
The Water Tower

Steve Leo, Client Service Manager
Constantine Engineering, an Ardurra Company

11:20 a.m. - 12:05 p.m. Integrated Hydrologic, Water Quality, and Ecological Restoration at Lake Eva

(Track B)

0.75 credit

An innovative One Water approach was used to develop a restoration project for an impaired lake which includes the capture of excess surface water to increase lake water levels, groundwater recharge, and restoring 145-acres of distressed wetlands. This session will provide an overview of the project and share how the lake and downstream water quality will improve due to wetland surface water treatment and regional green stormwater retrofits.

Jeff Herr, PE, DWRE, National Stormwater Leader
Brown and Caldwell

12:05 p.m. - 1:05 p.m. Lunch Break

1:05 p.m. - 1:50 p.m. Vision of the Future: Developing a Water Quality Master Plan to Advance Economic Goals

(Track A)

0.75 credit

Learn about a community that recently finalized an economic master plan to guide future growth and enhancement of its downtown area. The plan includes improved street networks, additional green space, new housing, and commercial space. A key goal of the plan is to improve connections between the core downtown and the waterfront. Under current stormwater regulations, implementation of the Master Plan will require reductions in pollutant loading to the surrounding water bodies. This presentation will discuss the development of the site selection framework, conceptualization of each stormwater treatment facility, and the final results of the study.

Priyanka Mohandoss, PE, Principal Engineer
Brown and Caldwell

1:05 p.m. - 1:50 p.m.

(Track B)

0.75 credit

Using Remote Sensing to Monitor Benefits of a Permeable Paver Project

The City of Roswell, GA has recently invested in three permeable paver projects with the expectation of water quality and detention storage benefits. In order to more accurately understand the water quality and runoff reduction benefits, the City used remote sensing to estimate an average annual runoff volume retained by the system and a water quality benefit in accordance with the Georgia Stormwater Management Manual. This session will review the project benefits and how they were able to calculate an average annual runoff volume and water quality benefit.

*David Elliott, PE, CFM, Mid-South Water Resources Leader
Brown and Caldwell*

*Sharon Izzo, PE, Deputy Director
City of Roswell, GA*

*Laurie Hawks, President
Hawks Environmental*

1:50 p.m. - 2:00 p.m.

Break

2:00 p.m. - 2:45 p.m.

(Track A)

0.75 credit

Asset Management: It's Not Just About the Assets, It's About the People

In the asset management world, we talk about asset management being a "journey," as if the assets go somewhere. But assets aren't the travelers here; it is the people within an organization who embark on that journey. A successful asset management program begins with people and ends with people; not with assets. This presentation will help you define what asset management means to your community and discuss how to include the right people to develop a successful and sustainable stormwater asset management program.

*Hal Clarkson, PE, CFM, IAM, Program Director
Woolpert*

2:00 p.m. - 2:45 p.m.

(Track B)

0.75 credit

**Popular Session Offered in
Two Time Slots*

[ENCORE PRESENTATION*] High Definition Stream Survey (HDSS): A Powerful Tool for Water Resource Management

Join us to see firsthand how the HDSS method provides a "virtual tour" of the waterway while providing GPS, depth, side scan imagery, water quality, velocity and other data linked to each second of the high definition video. This rapid, data-rich and inexpensive stream survey method is a powerful tool for water resource management.

*Brett Connell, Hydrologist / Director of Sales
Trutta Environmental Solutions*

2:45 p.m. - 2:55 p.m.

Break

2:55 p.m. - 3:40 p.m.

(Track A)

0.75 credit

The Ripple Effects of Collaborative Stream Restoration

The Brushy Creek Stream Stabilization project exemplifies a well-planned and well-executed Greenville County, SC public works project that collaborated between public needs, threatened infrastructure, and private property to provide an improved, cleaner, more stable stream for the community. Designed for demonstration, the project showcases several BMPs for urban bank stabilization and ecological restoration.

*Crystal Muller, PE, Project Manager
Woolpert*

*Judy Wortkoetter, County Engineer
Greenville County, SC*

2:55 p.m. - 3:40 p.m.

(Track B)

0.75 credit

Evaluation of Human and Dog Fecal Sources Impacting an Urban Creek

Bacteria and nutrients commonly impact surface waters across the country. Identifying bacteria sources is important in evaluating risks to public health and in locating and eliminating contributing sources to improve water quality. This session will reveal how advanced source tracking tools were leveraged to address elevated bacteria in an urban creek.

*Mike Hardin, PhD, PE, CFM, Senior Engineer
Geosyntec Consultants*

*Lisa Lotti, Stormwater Compliance Program Manager
City of Orlando, FL*

3:40 p.m. - 3:50 p.m.

Break

3:50 p.m. - 4:35 p.m.

(Track A)

0.75 credit

Underground Detention 101

With Underground Detention (UD) becoming more prevalent as a stormwater control device in today's world, this presentation is set up to provide an overview of Underground Detention from an engineer who has worked on the public and private side. Topics covered will include what is UD, different types of UD, basic UD design considerations as a designer or regulator, some current UD regulations, and UD inspections.

*Christopher Dent, PE, Project Manager/Engineer
SynTerra Corporation*

3:50 p.m. - 4:35 p.m.

(Track B)

0.75 credit

Assessing and Managing Fecal Coliform in the May River Watershed Headwaters

Rapid development and increasing levels of fecal coliform bacteria threaten water quality in the May River, a coastal watershed in South Carolina. To restore and protect water quality and shellfish harvesting, the Town of Bluffton, SC developed a long-term, continuous water quality model and evaluated management strategies to update the Watershed Action Plan. This session will provide an overview of the water quality model and management strategies created.

*Allison Bryan, Water Resources Engineer
Moffatt & Nichol*

*Kathryn Ellis, Water Resources Designer II
McCormick Taylor*

4:35 p.m. - 4:40 p.m.

Wrap Up

Friday, October 8, 2021 / Regular Conference

9:00 a.m. - 9:45 a.m.

(Annual Meeting)

Southeast Stormwater Association Annual Member Meeting and the Election of Board of Directors and Officers

9:45 a.m. - 9:55 a.m.

Break

9:55 a.m. - 10:40 a.m.

(Track A)

0.75 credit

Advancing Green Infrastructure in Coastal Georgia through Monitoring and a Case Study

The City of St. Marys, GA received 319(h) grant funds to incorporate GI/LID into its downtown streetscape project. This session will highlight lessons learned from implementation and 12-month monitoring results that explored hydrologic and water quality performance under the unique coastal constraints of shallow water tables and flat topography.

*Robert Brown, PhD, PE, Senior Water Resources Engineer
Goodwyn, Mills and Cawood*

9:55 a.m. - 10:40 a.m.

(Track B)

0.75 credit

Green Stormwater Infrastructure: What's Green Got to Do With It?

Municipalities throughout the Southeast are implementing green stormwater infrastructure design practices, but many are developers not “buying in” to these practices. Is it too expensive to build or too expensive to maintain? Is it really? The presentation is designed to help municipalities “sell” developers on the idea of using green infrastructure design on their projects.

*Chris Bogdan, Ntl Business Development Manager - Urban Green Infrastructure
Ferguson Waterworks*

10:40 a.m. - 10:50 a.m. *Break*

10:50 a.m. - 11:35 a.m.

(Track A)

0.75 credit

Time for a Challenge! Atlanta's Green Infrastructure Design Challenge

In early 2021, the City of Atlanta announced the winners of the Green Infrastructure Design Challenge. This effort was created to spark interest in developing creative solutions to some of the City's water quality and infrastructure challenges in a friendly and competitive manner. The difference with this Challenge is that winning teams take their concept visions all the way through final design. In addition, winners will be highlighted in a virtual celebration, through social media, and in-person when the time is right.

*Deborah Martin, PMP, LEED BD&C, NGICP, Project Manager
City of Atlanta, GA*

*Glen Behrend, PE, Civil Engineering Manager
City of Atlanta, GA*

10:50 a.m. - 11:35 a.m.

(Track B)

0.75 credit

Improved Water Quality: How to Shape Development with Incentives Instead of Mandates

How can communities entice developers to help improve water quality and meet higher environmental standards when local codes don't require it? Incentives and credit programs can help drive low-impact development. Come learn how communities across the US are successfully using these tools.

*Kim Patak, PE, CFM, ENV SP, Associate, Project Manager
Freese and Nichols*

*Ian Jewell, FNI Associate
Freese and Nichols*

11:35 a.m. - 11:45 a.m. *Break*

11:45 a.m. - 12:30 p.m.

(Track A)

0.75 credit

Opportunities for MS4 Engagement Through Volunteer Monitoring Programs

Partnering with volunteers to assist with water quality monitoring programs can have many benefits. One benefit is to help fulfill MS4 permit requirements for minimum control measures such as Public Education/Outreach, Illicit Discharge Detection, and Public Participation. This session will share how a volunteer partnership can lead to cost savings for screening streams and can also help identify alerts for high bacteria, unusual odors and excessive litter.

*Sierra Hylton, Program Coordinator
South Carolina Adopt-a-Stream Program*

11:45 a.m. - 12:30 p.m.

(Track B)

0.75 credit

Incorporating Nutrient Offset Banking into Local Government Stormwater Strategy

Over the last several years the City of Wilson, NC has constructed several non-compulsory Stormwater Control Measures to improve detention and water quality within the watershed encompassing their downtown district. This session will provide an overview of the process undertaken to establish the first Nutrient Offset Bank Site sponsored by a local government entity.

*Rebecca Stubbs, PE, Project Manager
McAdams*

*Noah Parsons, Stormwater Manager
City of Wilson, NC*

12:30 p.m. - 12:40 p.m. *Break*

12:40 p.m. - 1:25 p.m. **Federal Update and National Stormwater Trends**

(General Session)

0.75 credit

The National Association of Clean Water Agencies will provide an update on water-related issues and US EPA's stormwater program priorities at the national level, focusing on stormwater policy and permitting programs.

*Emily Rimmel, Director of Regulatory Affairs
National Association of Clean Water Agencies*

1:25 p.m. **Wrap Up & Adjourn**

Stormwater Management Systems

retain-it[®] is a high capacity underground stormwater management system

Manages detention, retention, infiltration and treatment of stormwater in a single integrated system.

Modular components provide for rapid installation, with installation times as low as 3 to 5 minutes per unit.

Pre-engineered system designed and manufactured to meet a true H-20 loading capacity. The load-carrying capacity of precast concrete does not rely on the strength and quality of the surrounding backfill materials or a structural stone zone of support, reducing footprint and overall system costs.

Technical support personnel are onsite for every installation, providing expertise for high-quality and cost effective installation and project coordination.

Storm system component bundling is available, with unlimited options, layout scenarios and design flexibility.

Value engineering support with technical design aids available.

More information available at: retain-it.com

Protected by US Patents 8,360,100 & 8,590,564 & 9,057,188 & 9,441,355

WHY PRECAST CONCRETE?

- Superior strength and durability
- High degree of quality control
- Quick availability
- Reduced weather dependency
- Concrete mass resists buoyancy
- Non-corrosive
- Environmentally friendly

16th Annual Regional Stormwater Conference

Live Conference Helpful Hints

Please review the following to help you prepare for and make the most of your conference experience.

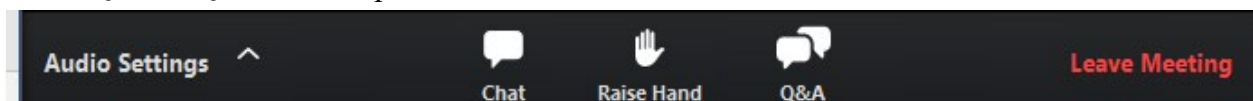

Zoom Compatability – The live conference will be conducted via Zoom Webinar. Complete the Zoom Test at <https://zoom.us/test> to ensure compatibility.

Live Conference Page – Access the live conference online at www.seswa.org/2021live. See sample page below. From the live conference webpage you can select the sessions that are of interest to you and easily navigate between rooms.

The screenshot shows the "2021 Annual Conference LIVE" webpage. At the top, there's a banner image of a lighthouse by the water with the SeSWA logo in the top right corner. The banner text reads "16th ANNUAL REGIONAL STORMWATER CONFERENCE" and "OCTOBER 6-8, 2021 | NOW ONLINE". Below the banner, the page is divided into two main sections: "Wednesday, October 6, 2021 / Pre-Conference" and "Thursday, October 7, 2021 / Regular Conference". The Wednesday section lists a session from 1:00 p.m. to 3:00 p.m. titled "[Pre-Conference Workshop] Effective Stormwater Public Education and Outreach" with 2.0 credits. It includes a note "Separate Registration Required" and a bulleted list of topics: "Stormwater Education - Getting Messages to the Public from a Safe Distance", "Empowering Citizens with a Voice and Role in Municipal Stormwater", and "Gaining Ground for Healthy Waterways with Sustainable Residential Landscapes". The Thursday section lists a session from 9:00 a.m. to 10:15 a.m. titled "[General Session] Welcome, Opening Address-New Initiatives in Stormwater Mgmt-A Southeast Perspective" with 1.00 credit. Below this, it shows a session from 10:15 a.m. to 10:25 a.m. labeled "Break".

Zoom Toolbar – Make the most of your conference experience through Chat and Q&A:

- Chat = In-session communications. Be sure to select “All Attendees and Panelists”
- Q&A = Questions for presenters

Technical Issues – If you experience technical issues during the live conference, please follow the steps below:

- Close your browser
- Access the live conference page
- Reconnect to the session

If technical problems persist, please contact SESWA at info@seswa.org or 866-367-7379.

YOUR PARTNER FOR GREEN WATERWORKS SOLUTIONS

An emerging leader in urban green
infrastructure and low impact development

Over the last few years, we've addressed a growing focus on green technology by expanding our services and products to reflect the needs of our communities. To better serve you and your municipalities, we have developed a suite of high performance, cost appropriate and low maintenance solutions in the urban green stormwater infrastructure and low impact development space. Our offerings have been grouped in the following categories:

SPACE-EFFICIENT STORAGE

Minimize your excavation; maximize your storage. Our offerings in subsurface stormwater storage allow for detention, harvest and reuse or infiltration into the native soil.

FILTERS AND SCREENS

We provide mechanical filters and screens for both surface green infrastructure and subsurface storage systems. By providing superior protection from debris, our offerings effectively reduce the cost and frequency of stormwater asset maintenance.

MEDIA AND BIOFILTRATION

We offer high-performance and aesthetically pleasing vegetated and media-based treatments to cut down on pollutants entering downstream waterbodies and natural resources.

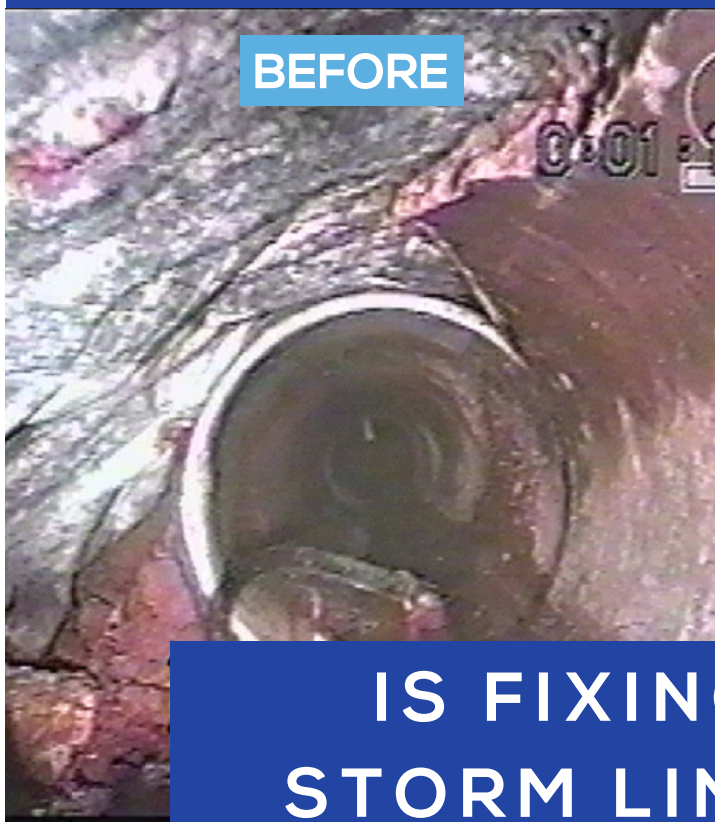

ALTERNATIVE SURFACES

As alternatives to traditional pavements, we offer a variety of unique porous and permeable surfaces. Designed to convey water rapidly down through surfaces, our offerings allow efficient infiltration into native soils and reduces the amount of piping and drains required on a site.

Discuss your needs with a Ferguson Waterworks expert to customize an economical solution to meet your regulatory requirements for stormwater using our suite of innovative solutions.

Join Business Development Manager, Chris Bogdan, during the SESWA Annual Conference for his presentation "Green Stormwater Infrastructure: What's Green Got to Do With It?"
Friday, Oct. 8 from 8:30 A.M.–9:15 A.M.

16th Annual Regional Stormwater Conference

Continuing Education Instructions

Professional Engineers: Professional Engineers, Certified Floodplain Managers and anyone requesting a Certificate of Attendance are eligible for credits based on the sessions attended. SESWA offers continuing education for Professional Engineers in Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina and Tennessee. Of these states, Florida and North Carolina require that continuing education providers be approved in advance. SESWA is an approved provider for Florida (#0004288) and North Carolina.

All Other Professions: SESWA is happy to provide you with a Certificate of Attendance for attending our conference. A Certificate of Attendance will be sent to all attendees that complete a Continuing Education and Evaluation Form(s).

Instructions: You will receive an email at the conclusion of each day for which you are registered to participate in the conference. The email will include a link to an online Continuing Education and Evaluation Form. **You must fill out a form for each day that you are requesting continuing education.** We will only be able to accept forms during the conference; forms cannot be submitted after the conference.

After the conference, SESWA will email you a Certificate of Attendance showing the total number of continuing education hours you received. You can use that certificate as proof of attendance.

If you have questions, please contact SESWA for clarification at info@seswa.org or call us at 866-367-7379.

- Bridge Scour Analysis
- GIS Infrastructure Inventory
- Low-Impact Design
- Stormwater Utility Development and Support
- Combined Sewer Overflows
- Dam Analysis and Design
- Development Reviews
- Staff Augmentation

TREATMENT TRAIN SOLUTION

Improve Water Quality

StormTrap products can be integrated into a comprehensive stormwater treatment train that features pretreatment, volume control, filtration and harvesting.

The treatment train includes the SiteSaver water quality BMP as a pretreatment device. The SingleTrap or DoubleTrap systems, utilized for storage, filtration or other treatment applications, create one complete solution that removes a wide range of water impurities.

SiteSaver®

SingleTrap®

DoubleTrap®

Creators of High Definition Stream Survey (HDSS)

Fundamental to achieving clean water standards is understanding the context, distribution and severity of the problems in your streams and developing effective long-term plans to address them. But, collecting this information is time consuming and expensive which makes effective clean water planning very difficult. A High Definition Stream Survey (HDSS) is a complete system that rapidly documents stream corridor conditions and provides the information necessary for you to successfully and effectively manage your MS4 and achieve cleaner water.

WWW.TRUTTASOLUTIONS.COM

TRUTTA

ADVANTAGES

Rank cost/benefit outcomes of management actions.

Prioritize problem locations and mitigation approaches throughout the entire MS4 system.

Flexible data classification: BEHI, SCA, RGA and more.

Lower long-term MS4 compliance costs.

Qualified MS4 Stormwater Compliance Professional (MS4-SCP) on staff.
